We attended a four-day tailor made seminar from 20. - 23. October 2014 with 15 representatives of dairy companies and dairy farmers and with the main focus on dairy management in Israel.

It was a very well planned tour, where all practical arrangements were taken care of. We experienced four splendid days visiting different types of dairy farms and several different organizations, research centres and companies within the Israeli dairy production and dairy management.

All of the speakers we met were highly professional and very competent – very interested in discussing dairy management and related issues with us.

All days we had a dairy professional (nutritionist and/or dairy scientist) along with us. This was a great opportunity to follow up on questions to all the impressions we experienced during our 10-12 hour daily program.

A professional tour guide and an interpreter drove us from place to place, telling us almost everything about geography, history and culture during the whole seminar, and finally they guided us during a magnificent visit in Jerusalem, Bethlehem, Masada and Tel Aviv with its surrounding dairy research and breeding centre. We also had the chance to meet with the representatives of the Israeli National Committee of the International Dairy Federation - IDF.

We definitely recommend other visitors with special interest into agriculture and dairy business to cooperate with the Israeli Dairy School and personally wish Ofier Langer and his team a prosperous and peaceful future development.

Berlin, 19. November 2014

Ines Märkle-Coldewey, Ph.D.

General Manager IDF-Germany and
Member of the IDF Board
